

HACKATHON

From virtual patients to biomedical knowledge graphs and back

In Partnership with

Virtual patients and biomedical knowledge graphs are two powerful but disconnected technologies, developed by different experts with distinct objectives.

The **VPE Team** from BioMed X Institute in partnership with Sanofi invites you to unify these technologies and enable the automatic generation of virtual patients from biomedical knowledge graph.

Key points

- We will leverage the technologies of both worlds to bridge the divide and enable seamless generation of virtual patients from biomedical knowledge graphs.
- Teams composed of people experienced in data science and machine learning, and computational biology will compete with the guidance of industry and research experts.
- Your work will contribute to open-source projects, ensuring visibility and impact in the global research community and you will receive a formal certificate recognizing your participation and contribution—great for your professional portfolio and LinkedIn profile.

 March 6th-7th, 2025

 09.00 - 17.00

  or Online

Nikola-Tesla-Strasse 1, 69124 Heidelberg

**All outputs of the hackathon
will be open-source and
eventually published**
